Publication list

I have co-authored 83 scientific articles intended for peer-reviewed publication, including 7 first-author papers. They have been cited more than 4,000 times and have an h-index of 35, with more than 300 citations on my first-author papers. My publications include three companion reviews on galaxy alignments written for a special issue of Space Science Reviews (B. Joachimi et al. 2015, A. Kiessling et al. 2015, D. Kirk et al. 2015). The full list of publications can be accessed at this url. I also wrote an invited 'News & Views' article for the 4 July 2017 edition of Nature Astronomy, accessible here. This document is maintained live on `github`.
