## Research Interests

I am an observational astrophysicist. My research focuses on galaxy cluster physics including observable–mass scaling relations for cosmological analyses, brightest cluster galaxies, the mass content of cluster galaxies and diffuse radio emission. I am also interested in intrinsic galaxy alignments, both as contaminants for cosmic shear and as a physical mechanism in its own right. I use various tools and techniques to study these phenomena, including weak gravitational lensing, spectroscopy, and the exploitation of optical surveys in general. I have presented my work at various conferences, workshops and seminars in Chile, Europe and the US.

**Collaborations:** Atacama Cosmology Telescope (ACT), Canadian Cluster Comparison Project (CCCP), Kilo-Degree Survey (KiDS), Hyper-Suprime Cam survey (HSC), Multi-Epoch Nearby Cluster Survey (MENeCS).

## Employment and Education

*Present* — Postdoctoral Research Associate, Princeton University  
*2016* — Ph.D. Astrophysics, Universiteit Leiden, The Netherlands  
*2012* — M.Sc. Astrophysics, P. Universidad Católica de Chile, Chile  
*2010* — B.Sc. Astronomy, P. Universidad Católica de Chile, Chile

## Observing Proposals (as PI)

*VLT Survey Telescope* – 6h for weak lensing observations of a massive galaxy cluster  
*Gemini-South* – 24 h for imaging and spectroscopic follow-up of massive high-redshift cluster candidates  
*Giant Metrewave Radio Telescope* – 44 h to search for diffuse radio emission in massive galaxy clusters

**Observing Experience:** I have spent roughly 180 hours observing in optical (Gemini-South) and near-infrared (ESO-NTT) telescopes performing both imaging and spectroscopy.

**Technical skills:** I am an experienced `python` programmer, and I also have some experience with IRAF/PyRAF. I have written `pygmos`, a Python/PyRAF pipeline to reduce Gemini-GMOS spectra which is available [here](#). Other codes I have written are posted at my [github](#) page.

**Community Activity:** I have served as a referee for A&A, ApJ, and Nature Astronomy.

## Teaching Assistant Experience

*2013-B* – Stellar Dynamics (Leiden, Prof. S. Portegies Zwart)  
*2012-A* – Extragalactic Astrophysics (PUC, Prof. L. F. Barrientos)  
*2011-A* – Extragalactic Astrophysics (PUC, Prof. L. F. Barrientos)  
*2011-A* – Laboratory of Thermodynamics and Kinetic Theory (PUC, Prof. U. Volkmann)  
*2010-B* – Experimental Astrophysics (PUC, Prof. L. F. Barrientos)

## Other Work Experience

2007 — 2008 – Ski instructor at Homewood Mountain Ski Resort in Lake Tahoe, CA. Obtained the certification as Level I ski instructor by the Professional Ski Instructors of America (PSIA).

2006 — 2007 – Lift operator at Sun Valley Resort, Sun Valley, ID.
