

Publication list

I have co-authored 77 scientific articles intended for peer-reviewed publication, including 7 first-author papers. They have been cited more than 3,400 times and have an h -index of 34, with more than 280 citations on my first-author papers. My publications include three companion reviews on galaxy alignments written for a special issue of Space Science Reviews (B. Joachimi et al. 2015, A. Kiessling et al. 2015, D. Kirk et al. 2015). The full list of publications can be accessed at [this url](#). I also wrote an invited ‘News & Views’ article for the 4 July 2017 edition of Nature Astronomy, accessible [here](#). This document is maintained live on [github](#).
